quick facts on...

RESIDENTIAL/COMMUNITY Water-Use Restrictions PHASE I

MARCH 2007

The South Florida Water Management District is a regional, governmental agency that oversees the water resources in the southern half of the state. It is the oldest and largest of the state's five water management districts.

Our Mission is to manage and protect water resources of the region by balancing and improving water quality, flood control, natural systems, and water supply.

NOTE

This document represents a summary of Phase I Water-Use Restrictions as they apply to **residential/community use**. For more details, or for a copy of the Water Shortage Rule visit www.sfwmd.gov

Water Shortages

Water shortages and water conservation fall under the District's mission for water supply.

South Florida depends upon rainfall for its water supply. While South Florida gets an average of 52 inches of rain a year, the rainfall is seasonal, falling mostly in the summer and fall. The rainfall is also cyclical, meaning there are typically 10-year cycles of drought and flood.

To manage water shortages in an organized and efficient manner, the District has adopted a Plan and a Rule to restrict water use when supplies fall short. (Sec. 373.246, Florida Statutes; Ch. 40E-21, Florida Administrative Code). The goal is to protect the remaining supply by conserving water, preventing saltwater intrusion and assuring a fair distribution of available supplies.

Water Users

Water users are grouped into categories according to use – residential, agricultural, industrial, recreational, etc. – and, according to the source from which the water comes. Residential users are the largest user-group affected by water restrictions.

Water-Use Restrictions

The District has established specific water-use restrictions according to the severity of the water shortage – Phase I, **moderate**; Phase II, **severe**; Phase III, **extreme**; and, Phase IV, **critical** – each requiring an increasingly larger reduction in water use. The District correlates each phase of the restrictions to the overall percentage of reductions needed.

Phase I water restrictions require water users to limit outdoor water use (see back page). These actions are intended to produce a 15 percent reduction in overall demand

on our water resources by all users. Because all users do not use the same amount of water, Phase I restrictions DO NOT mean that public utilities must reduce the amount of water they sell by 15 percent. It is up to ALL water users from all sources to get us to the overall 15 percent reduction.

General Guidelines

- All wasteful and unnecessary water use is prohibited.
- Essential services involving public health and safety, such as fire-fighting, are not restricted.
- Water-use restrictions DO NOT apply to the use of reclaimed water.
- Water-use restrictions generally DO apply to water from public utilities, private wells and all surface waters such as canals, lakes, ponds and rivers.
- Any exemptions from the restrictions must be through a formal process, that is, by obtaining a variance from the District.

Residential/Community Water-Use Restrictions Phase I Summary

Because about half the water used in South Florida is for landscape irrigation, the District targets outside water-use for restrictions. Irrigation is most

efficient in the early-morning hours when less evaporation occurs.

Florida's Water
It's Worth Saving

Landscape Irrigation & Maintenance for Homes With Less Than Five Acres of Land

- Watering is permitted on Mondays, Wednesdays and Saturdays from **4-8 a.m.** for homes with addresses that end with an odd number (1,3,5,7,9).
- Watering is permitted on Tuesdays, Thursdays and Sundays from **4-8 a.m.** for homes with addresses that end with an even number (0,2,4,6,8) or with no address.
- Hand watering with one hose and an automatic shut-off nozzle is also allowed from **5-7 p.m.** on the same days.
- New landscaping, planted for less than thirty days, may be watered Monday through Friday from **2-8 a.m.**
- New landscaping may be watered at any time by hand with one hose and an automatic shut-off nozzle.
- Pesticide applications by homeowners or nonlicensed individuals are allowed during hours and days of the watering schedule.
- Pesticide application is permitted by a licensed pesticide technician at any time. The applicator must be present during application.
- When cleaning, adjusting or repairing existing irrigation systems, ten minutes of operating the irrigation system per zone/per week is permitted. And, ten minutes of system operation is permitted on a one-time basis for new irrigation systems.

Landscape Irrigation & Maintenance for Homes With More Than Five Acres of Land

- Watering is permitted on Mondays, Wednesdays and Saturdays from **12:01- 8 a.m.** for homes with addresses that end with an odd number (1,3,5,7,9).
- Watering is permitted on Tuesdays, Thursdays and Sundays from **12:01- 8 a.m.** for homes with addresses that end with an even number (0,2,4,6,8) or with no address.
- New landscaping, planted for less than thirty days, may be watered Monday through Friday from **12:01- 8 a.m.**
- New landscaping may be watered at any time by hand with one hose and an automatic shut-off nozzle.
- Pesticide applications are allowed during the hours/days of the watering schedule.
- Pesticide application is permitted by a licensed pesticide technician at any time. The applicator must be present during application.
- When cleaning, adjusting or repairing existing irrigation systems, ten minutes of operating the irrigation system per zone/per week is permitted. And, ten minutes of system operation is permitted on a one-time basis for new irrigation systems.

Car, Boat & Equipment Washing

- Washing of cars, boats and other equipment is permitted **4-8 a.m.** and **5-7 p.m.** on the landscape watering days. Washing must be done on, or must drain to, a non-paved surface that permits water to soak into the ground. And, it must be done using a hose with an automatic shut-off nozzle or low-volume pressure cleaner.

- Washing and detailing of cars is allowed anytime if done by a licensed individual or company using an automatic shut-off nozzle and low water-use techniques.
- Rinsing and flushing of boats after saltwater use is allowed once a day for up to 15 minutes per boat.

Other Outdoor Water Uses

- Washing or rinsing of sidewalks, driveways, streets or other paved surfaces is **NOT ALLOWED** at any time unless done with low-volume pressure cleaning equipment. That is, the equipment must be designed to reduce the volume of water used.
- Low-volume pressure cleaning of any surface and structure is permitted.

- Live-aboard boats that serve as a primary residence may be washed or rinsed during the landscape watering day/time schedule based on the number of the boat slip or the address of the location of the dock.
- Filling or refilling of swimming pools is allowed. If a pool is emptied, it must drain onto a non-paved surface such as a lawn.
- Re-circulating fountains and ornamental water features may be operated if the water use is efficient, meaning that there is no wind draft, leaking or overflowing of water.

Further Water Supply Shortages

The District may declare more stringent restrictions as set forth in Phases II, III and IV. For the average person, the major difference in the phases is the number of days and hours that water may be used outside the home. Residential/Community irrigation hours: Phase II, two days per week for 4 hours; Phase III, one day for three hours; Phase IV, one day for one hour; and, in more severe conditions, the District may restrict all outside watering.
